## Welcome to the Clinic of Obstetrics and Gynecology CCU Sarajevo!

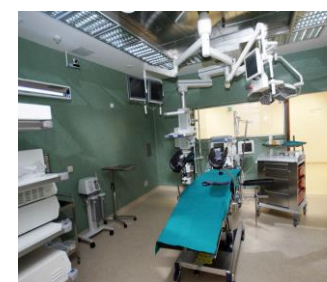

The Clinic of Obstetrics and Gynecology was founded in 1974. The new Clinic of Obstetrics and Gynecology in the locality of Jezero opened its doors for the citizens of Sarajevo for the first time in 1977. This building had 13.500 square meters of usable space, 8 delivery halls, 16 delivery beds, 4 operating halls and 9 beds of intensive care with an organised department of perinatology.

With the onset of war in Bosnia and Herzegovina and the city of Sarajevo, in May 1992, as a consequence of bomb-shelling, the clinic was moved to locality of Koševo where it stayed till 1995 and was moved afterwards to the building of the former eye clinic.

In November 2010 the Clinic of Obstetrics and Gynecology was returned to location Jezero, where it is today and represents a highly specialized institution in diagnosis and treatment of gynecological and obstetric cases with professional, scientific and educational activities. The Clinic of Gynecology and obstetrics has a capacity of 123 beds and Intensive care unit with 18 beds. The operating tract has four operating rooms (three gynecological and one obstetric).

The clinic has the latest equipment and modern facilities according to the standards of good medical practice. The clinic is organised through following departments:

- Department of Reproductive Medicine,
- Diagnostic and ambulance department
- Department of neonatology
- Department of operative gynecology and gynecological oncology
- Operation theatre department with intensive care unit
- Department of urogynecology
- Department of conservative and juvenile gynecology
- Delivery hall department with obstetric ambulance
- Puerperial department - capacity 32 hospital beds (16 beds for natural deliveries and 16 beds for caesarean sections), 32 baby beds and eight incubators.
- Department of Pathology of pregnancy – capacity of 27 beds

Services that are provided in our clinic are:
